## Advanced Law-Making: Legislative Drafting for Complex Policy Challenges

Duration: 5 days

On-Site

### 01 Who Should Attend

- Ministries, departments, and government agencies
- Law reform commission professionals
- Regulatory authorities and policymakers
- Constitutional and public law practitioners
- Legislative researchers and legal researchers
- Governance and public policy professionals
- Professionals involved in regulatory development
- Senior officials responsible for policy and legislation

### 02 About the Course

The **Advanced Legislative Drafting for Complex Policy Areas Training Course** is designed to strengthen the skills required to develop clear, coherent, legally sound, and policy-responsive legislation in technically demanding and rapidly changing areas. The course moves beyond basic legislative drafting to address complex policy questions, competing interests, institutional mandates, regulatory frameworks, and implementation challenges.

Participants will explore advanced techniques for translating policy objectives into enforceable legislative provisions while ensuring consistency with constitutional principles, existing laws, human rights obligations, and institutional responsibilities. Practical drafting exercises and case studies will help participants develop legislation that is precise, implementable, adaptable, and resistant to ambiguity.

### **03 Workshop Objectives**

---

- Understand advanced principles of legislative drafting, including clarity, precision, and consistency.
- Learn about the unique challenges of drafting legislation for rapidly evolving and complex policy areas.
- Master methodologies for translating intricate policy objectives into legally enforceable provisions.
- Develop proficiency in understanding the relationship between primary and delegated legislation.
- Explore best practices for incorporating international law and obligations into domestic legislation.
- Learn about robust strategies for managing stakeholder engagement and public consultation in drafting.
- Drive the implementation of frameworks for continuous improvement in legislative drafting practices.

### **04 Module Topics**

---

#### **Module 1: Advanced Principles of Legislative Drafting**

- ??? Review of core drafting principles: clarity, conciseness, consistency, precision
- ??? Mastering the use of definitions, substantive provisions, and procedural clauses
- ??? Techniques for avoiding ambiguity, vagueness, and redundancy in legal texts
- ??? Drafting for different legislative styles and traditions (e.g., common law vs. civil law approaches)
- ??? The legislative process and the drafter's role: from policy to enactment

#### **Module 2: Drafting for Emerging Technologies**

## **PB INSTITUTE OF RESEARCH AND TECHNOLOGY**

**P.O Box 21457-00100**

**Nairobi - Kenya**

**Mobile: +254 721 214 795**

**Email: [info@pebblesinstitute.org](mailto:info@pebblesinstitute.org)**

- ??? Legal challenges in regulating Artificial Intelligence (AI), blockchain, and autonomous systems
- ??? Crafting technology-neutral and future-proof legislative provisions
- ??? Addressing liability, data governance, and ethical considerations in tech legislation
- ??? Regulatory sandboxes and agile legislative approaches for innovation
- ??? International harmonization and cross-border issues in technology law

### **Module 3: Complex Environmental & Climate Change Legislation**

- ??? Drafting for climate change mitigation and adaptation policies
- ??? Legal frameworks for carbon markets, renewable energy, and green finance
- ??? Environmental impact assessment (EIA) and strategic environmental assessment (SEA) provisions
- ??? Addressing complex scientific and technical concepts in environmental law
- ??? Compliance and enforcement mechanisms in environmental legislation

### **Module 4: Public Procurement & Anti-Corruption Laws**

- ??? Drafting transparent and competitive public procurement frameworks
- ??? Incorporating anti-bribery and corruption measures into procurement legislation
- ??? Legal provisions for whistleblower protection and integrity pacts
- ??? Regulating e-procurement and digital platforms for public contracting
- ??? International standards and conventions in anti-corruption law

### **Module 5: Health Law & Bioethical Legislation**

- ??? Drafting for personalized medicine, genomics, and gene editing technologies
- ??? Legal frameworks for data privacy in digital health and medical research
- ??? Regulating new medical devices, pharmaceuticals, and clinical trials
- ??? Addressing complex bioethical dilemmas through legislative language (e.g., end-of-life, reproductive technologies)
- ??? Informed consent provisions in highly specialized medical contexts

### **Module 6: International Obligations & Comparative Insights**

**PB INSTITUTE OF RESEARCH AND TECHNOLOGY****P.O Box 21457-00100****Nairobi - Kenya****Mobile: +254 721 214 795****Email: [info@pebblesinstitute.org](mailto:info@pebblesinstitute.org)**

- ▶ ??? Translating international treaty obligations into domestic legislation
- ▶ ??? Incorporating principles of international human rights law into national statutes
- ▶ ??? Utilizing comparative constitutional and legislative models for reform
- ▶ ??? Drafting for multilateral agreements and cross-border cooperation
- ▶ ??? Harmonization and convergence in legislative drafting across jurisdictions
